Annex C
Application for registration and test results

DIN 18873-2 ***Methods for measuring of the energy use from equipment for commercial kitchens – Part 2: Commercial coffee machines:2016-02***

HKI Industrieverband Haus-, Heiz- und Küchentechnik e.V.
Amelia-Mary-Earhart-Straße 12
60549 Frankfurt a.M.

Applicant _____

_____

_____

Manufacturer name _____

Manufacturer address _____

_____

Website _____

Email _____

Type designation _____

Equipment / features _____

_____

Rated connected load [kW] _____

Year of test _____

Testing body _____

Additional requirements (optional) _____

_____

_____

© HKI Industrial Association for house, heating and kitchen technology

Comments (optional) Please see manufacturer's documentation for information on complete output capacities

Capability for connection to an interface for power optimization (DIN 18875)

Yes	Optional	No	No Information

Product requirements

- Energy loss of hot beverage makers per day [kWh] _____
- Measurements of the energy loss of hot beverage makers per day by optional energy-saving operating methods [kWh] _____
- Output rate Espresso [cups/hour] _____
- Output rate Cappuccino [cups/hour] _____
- Output rate Cafe Creme [cups/hour] _____
- Output rate hot water [cups/hour] _____
- Output rate filter coffee [cups/hour] _____
- Energy loss in milk refrigeration systems as per day [W] _____
- Energy loss in milk refrigeration systems per day and per liter milk container capacity [W] _____
- Connected load as indicated on the rating plate [kW] _____

By signing, we acknowledge and accept the provisions of this database.
Any deficiencies in our product shall be reported by us to HKI Industrieverband Haus-, Heiz- und Küchentechnik e.V. If deficiencies in our product are identified, it shall be removed from the database by HKI Industrieverband Haus-, Heiz- und Küchentechnik e.V., and the right to demonstrate compliance via the database shall be suspended.
